

How to connect to our WiFi on your iPhone or iPad

Did you know that as an East Kent Colleges Group student, you have access to our WiFi for all your own devices, while studying at our campuses?

You also have access to WiFi anywhere that supports eduroam, like most universities, and some hospitals. Simply follow this quick guide to connect.

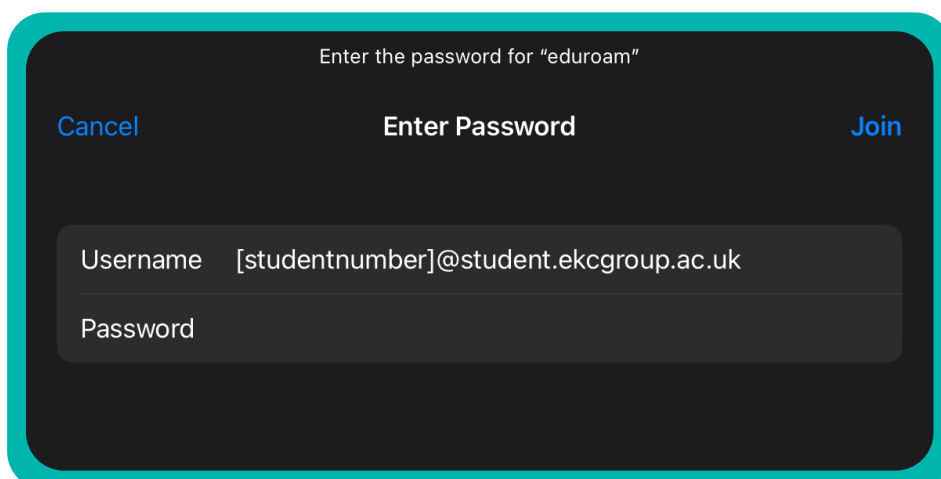

Step 01:

Navigate to your device's WiFi settings, and select the network called "eduroam".

Step 02:

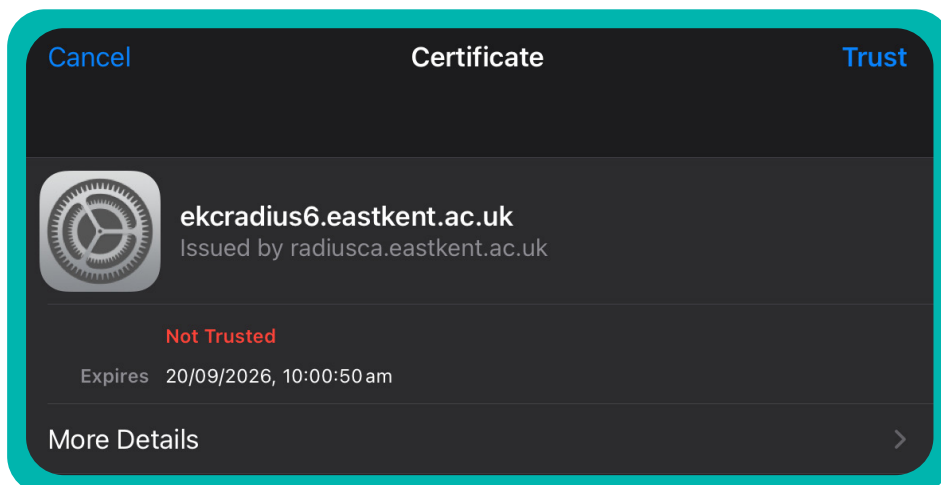

Input your username and password. This will be your student number, followed by @student.ekcgroup.ac.uk. If you can't remember it, you can find your student number at the bottom of your ID card. Your password will be the same one you use to log into College computers.

Step 03:

Once you've pressed join, you will see a pop-up. Click 'trust' in the top right hand corner, and you will be connected!

If that didn't work, you will need to use the 'geteduroam' tool, which you can find on the page linked through the QR code.

Want to learn more about digital skills for students? Visit the hub for digital skills via EKC Online, or follow the QR code.
